In preparation:

1. **Blood Pressure Variability:** Methodological Aspects, Clinical Relevance and Practical Indications. Position Paper by the ESH Working Group on Blood Pressure Monitoring and Cardiovascular Variability. Final draft completed - Jan. 2022.
2. **Cuffless Blood Pressure Monitors:** Review and Statement: ESH Working Group on BP Monitoring & Cardiovascular Variability. First draft completed - Jan. 2022.

## **Meetings organized/planned this year**

- Blood pressure monitoring Teaching Session: organized during each annual ESH meeting
- Satellite session during the ESH 2022 on BP measuring devices design requirements

## **Participation to the ESH Annual Meeting**

- Sessions proposed for 2022 ESH meeting
  - ESH BP monitoring guidelines
  - BP variability & telemonitoring
  - Cuffless BP measurement
- 

## **Scientific projects**

Completed this year: ESH Practice Guidelines on BP Measurement  
ESH Consensus Statement on Home BP monitoring

Ongoing: ESH Consensus Statement on BP Variability  
ESH Consensus Statement on Cuffless BP monitors

Ongoing: Collaboration with US Association for the Advancement of Medical Instrumentation (AAMI) and International Organization for Standardization (ISO) for developing an Amendment of AAMI/ESH/ISO Universal Standard (ISO 81060-2:2018) for evaluation wide-range cuffs (G Stergiou, P Palatini, R Asmar, G Parati).

Plan for next year: New major project in internal discussion to announce soon

**Educational projects:** Blood pressure monitoring Teaching Session: organized during each annual ESH meeting

**Collaborations with other WGs/Scientific Societies:** No

**Other remarks:** None

**Filled by (full name):** George Stergiou

**Date:** 10 Jan. 2022

# **European Society of Hypertension Working Group on Blood Pressure Monitoring and Cardiovascular Variability**

<b>Chairman:</b>	George Stergiou	2016-2022
<b>Secretary:</b>	Paolo Palatini	2016-2022
<b>Past Chairpersons:</b>	Gianfranco Parati	2012-2016
	Roland Asmar	2010-2012
	Jan Staessen	2008-2010
	Eoin O'Brien	1997-2010

## **History**

The European Society of Hypertension Working Group on Blood Pressure Monitoring was founded in 1997, with Professor Eoin O'Brien as its first Chairman. Succeeding chairpersons were Jan Staessen, Roland Asmar, Gianfranco Parati and George Stergiou. The broad objectives of the Group were to advance knowledge relating to all aspects of BP measurement with a view to advancing the technology available for hypertension research and to improve the clinical management of hypertension. These objectives were achieved in a number of ways including (i) production of guidelines for the clinical application of office, home and ambulatory BP; (ii) establishment of clinical validation protocols for BP measuring devices; (iii) organisation of meetings for communications and discussions, or lectures on BP monitoring; (iv) involvement of the manufacturing and engineering industries, the standards institutions, the nursing profession and other groups as seemed appropriate to the future development of techniques of measurement.

The Working Group has a truly international composition with 20 nucleus members who are distinguished BP measurement experts from Europe, Japan, China, Canada, Australia and the US. In 2011 the Working Group was merged with the 'Working Group on BP and Heart rate Variability' and was re-named the 'Working Group on BP Monitoring and Cardiovascular Variability'.

During the last 20 years the Working Group has had outstanding and sustained success in fulfilling all its objectives. (i) More than 100 papers have been published by the group, including many official statements, guideline papers and consensus statements on several aspects of BP measurement. (ii) The Working Group developed the International Protocol for the clinical validation of BP measuring devices, which has been the most widely used validation protocol around the world with >200 published validations. (iii) The Working Group has organised multiple educational meetings on BP monitoring and published the proceedings of these meetings. (iv) The Working Group has collaborated with the US AAMI and the ISO organisation for the development of a Universal Standard for the clinical validation of BP measuring devices (AAMI/ESH/ISO 2018).

## **Structure**

The business of the Working Group is conducted by the Board, which consists of no more than 20 members plus the Chairman and Secretary. The Working Group Chairman and Secretary are elected by the Board to serve for a period of two years with the option of being re-elected for one additional two-year term. Exceptions can be made with the agreement of the Board and the Membership in order to safeguard continuity within the Board. The Board for the moment consists of the original members of the Nucleus - Roland Asmar, Lawrie Beilin, Denis L. Clement, Peter De Leeuw, Robert Fagard, Yutaka Imai, Jean-Michel Mallion, Giuseppe Mancia, Thomas Mengden, Martin G. Myers, Eoin O'Brien, Paul Padfield, Gianfranco Parati, Paolo Palatini, Josep Redon, Jan Staessen, George Stergiou, Gert van Montfrans, Paolo Verdecchia, Bernard Waeber, and William White. Any member of the Board can apply for the position of Chairman or Secretary. New Board members are elected from the Working Group Membership by a proposer and seconder from the Board. The Board produces an annual report for approval by the Membership of the Working Group. The Board meets at least every year at the Scientific Meeting of ESH.
