Programme

Thursday, 25 April 2024

CONFERENCE ROOM

18:00–18:15

Opening Ceremony

18:15–19:00

Invited lecture. Why (and when) is it worth to gender our research (and how to do it well)?

Friday, 26 April 2024

CONFERENCE ROOM

08:30–10:10

Session 1: Pathophysiology of hypertension in women

08:30–08:55

Sex hormones and BP regulation

08:55–09:20

Salt and salt sensitivity of BP in women

09:20–09:45

Endothelin and the RAAS in pre-eclampsia: what role?

09:45–10:10

Sex differences in gut microbiota composition

10:10–10:30

Coffee break

10:30–12:10

Session 2: Update on hypertension risk factors in women

10:30-10:50	Arterial fibromuscular dysplasia: why is it more frequent in women?
10:50-11:10	Polygenic risk scores for BP and hypertensive disorders of pregnancy
11:10-11:30	Endometriosis and risk of hypertension
11:30-11:50	Polycystic ovary syndrome: an unrecognized CV risk factor?
11:50-12:10	Sleep disturbances and risk of hypertension: are there specificities in women?

12:10-13:30 **Lunch break**

13:30-16:00 **Session 3: Hypertension-mediated organ damages: are there gender differences? Gender differences in heart and vessels.**

13:30-13:55 Left ventricular hypertrophy and atrial fibrillation

13:55-14:20 Arterial structure and function

14:20-14:45 BP variability

14:45-15:10 Validating BP-measuring devices: what about pregnancy (on-line)

15:10-15:35 Heart failure with preserved ejection fraction and AF

15:35-16:00 Assisted reproductive technologies and premature vascular aging

16:00-16:20 **Coffee break**

16:20-17:50 **Session 4: Hypertension-mediated organ damages: are there gender differences?**

16:20-16:40	Gender differences in renal microcirculation
16:40-17:00	Gender, development and progression of CKD
17:00-17:20	Impaired fertility in women with CKD
17:20-17:35	Coronary heart disease management: what about gender differences?
17:35-17:50	Sex differences in hypertension and hypertensive phenotypes: the HELIUS study

Saturday, 27 April 2024

CONFERENCE ROOM

08:30-10:45	Session 5: Diagnosis and management of hypertension: are there gender differences?
08:30-08:50	Women perception of the risk of hypertension and CV diseases
08:50-09:10	Assisted reproductive therapies and risk of hypertension
09:10-09:30	Lifestyle programs after menopause: possible?
09:30-09:50	Monitoring women before, during and after pregnancy: the POPPY study
09:50-10:10	White coat hypertension: is the gender difference real?
10:10-10:30	Gender aspects of resistant and malignant hypertension
10:45-11:00	Coffee break

11:00-12:45	Session 5: Diagnosis and management of hypertension in women
11:00-11:20	Low percentage of women in clinical trials: what implications?
11:20-11:40	Association of BP with CV complications according to gender: is the difference real?
11:40-12:00	RAS blockers in women with childbearing potential: how to handle?
12:00-12:20	Sex-differences in hypertension management: does it matter?
12:20-12:40	New data on women and hypertension: what impact on future guidelines?
12:45-13:00	Discussion and closure of the meeting
